# CREATION & TECHNICAL EXCELLENCE

CINIER LT lines are characterized by a very high level of craftsmanship and design.

Technical excellence and style are the values of the family owned company since 1975.

Each CINIER LT is handmade in the CINIER workshops in France.

Being surrounded by beauty is a way of living.  
Everyone has his vision.  
The most important thing is to make sense.

ENTREPRISE FAMILIALE CRÉÉE EN 1975.

With 600 hundred high-performance LED lights, the CINIER LT wall light offers a powerful indirect lighting with a unique design.

By day,

The Cinier LT Wall fixture is a contemporary sculpture.

By night,

it is sublimated by 600 LED lights.

Several ways to release the light and achieve the desired ambiance :

- White, subtle and minimalist (warm white or neutral white)
- Or versatile in an array of colors (RGB Option)

CINIER LT can be set to automatically change the intensity of the light frame by simply using the infrared remote control.

24V DC (24V low voltage built-in transformer included) - Mains Voltage (100V to 277V).

The Cinier LT Wall Light achieves a 75% power consumption reduction and with a long operational life.

\*3000 K ≈ Warm white / \*4000 K ≈ Neutral white  
24 V transformer, driver and remote control included.  
Voltage: 100 V to 277 V. CE / UL norms for the transformer.

The remote control delivered with 100% white models commands both the frame light and the bracket light.

A switch is required for all the RGB frame models to command the led light of the bracket.  
The remote control commands only the colour mix of the frame.

2 frame options
